STATINTL

1. The memorandum of 5 March 1953 from the Acting Chief, P&SO to the DD/A on the above subject, asked for approval of something that was already being done. An employee of that office, who was stationed in the field, lived at such a distance from his station that he used a Government-owned vehicle to and from work.

2. Logistics still has the file on the subject, but the DD/A never answered in formal reply. There was a note attached to the file, stating that the subject had been settled over the telephone with Col. White, and that the file could be destroyed. This has not been done, however. In the file they have [redacted] opinion, and many buck slips with comments on them, which went back and forth with the memorandums. Apparently, the DD/A wanted to settle the matter in another way, because he asked what means the employee had of getting to work other than by use of the car. This question, a penciled note on a buck slip, he asked before he was informed that they were already using the car. Again a buck slip was used to answer his question, and then the question as to whether the employee could continue to use the car to and from work was apparently settled by telephone.
